We are developing an audit firm system, and I'm tasked with developing the tax section, in that tax section, there are several subsections such as.

- CIT – Corporate income tax
- IIT - Individual income tax
- VAT – Value added tax
- SSCL – Social Security Contribution Levy
- WHT - Withholding tax

As you can see, I have already designed the layout and the design I'm planning to use. (can be changed in the process of developing).

Even though I only design the CIT part, the same design and the layout will apply to the other remaining sections.

This audit firm has 4 branches,

1. South
2. West
3. Central
4. Northeast

Top Navbar – Go back, Go forward button, breadcrumb menu, user icon (which redirects to the client profile) and the notification icon

Body – there are 2 sections, the table and the form,

In the form section, there are,

- Client section (Client Details) – which has client id - which the user input directly, and the client's name which also input by the user.
- Tax section (Tax Period) – which has period input field (integers), the drop down which has options such as days, month, years. And the director id (DIN No.)
- Payment status – which has 3 radio buttons (Paid, Pending, IRD Paid).
- 2 buttons – Clear button (which clears entire form), and the submit button which submits the data.

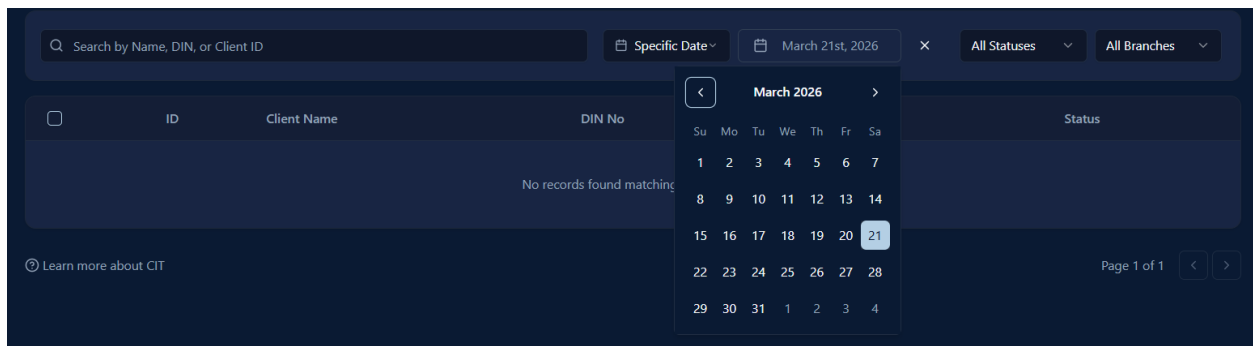

In the table section, there are,

- There are 5 columns – ID, Client Name, DIN No, Tax Period, status. The data will be obtained once the form is submitted.
- And there is also a select option box which we can select individually via the box in front of each record or else the user can select all via the box that is in the table header section.
- In the table it will only display 10 records at a time.

- Under the table there are 2 sections,
 - Which shows how many records show from the total
 - The other one is which record set you're in.
- And there are some options that help users to easily navigate across the data, by searching or filtering via date, status or branch
 - Search option – user can search by entering the name, DIN or Client's name
 - Date – the date filter has 5 options. Those are,
 - All dates – this displays every record

- Specific date – when the specific date options is selected the search bar will shrink from right side to make the space for the specific date to pick via a date picker.

- Month – when the month options is selected the same will happen but in this time the user will get to choose the month and the year. These 2 options will have 2 separate drop-down menus

- Year – when the year filter option in selected user will choose the year via drop-down menu.

☐	ID	Client Name	DIN No	Tax Period	Status
☐	CIT-2024-001	Acme Corp CL-001	DIN-8821	2026	Paid
☐	CIT-2024-002	Globex Inc CL-002	DIN-9932	2024 Q1 Jan 13, 2026	Pending
☐	CIT-2024-004	Initech CL-004	DIN-4451	2024-02 Jan 28, 2026	Paid

[Learn more about CIT](#) Page 1 of 1

- Period - when the period filter option is selected the user will get to choose the year via a date picker with 2 months, one for start date and other for the end date

- Status option: the status filter option has 3 options, those are,
 - Paid – Green Badger
 - Pending - Yellow Badger
 - IRD pending – Light blue badger
- Branches filter option: the branches filter option will have the earlier mentioned branches options. (south, west, central, northeast).

And at the bottom of the page there will be a clickable learn more button which have all the instructions about the page. The template will be this

?

Guide: CIT Dashboard

Master the tools for tracking and managing Corporate Income Tax records.

1

Advanced Filtering

Filter by Specific Date, Month, Year, or Period.
Combine with Status and Branch filters for precision.

2

Bulk Actions

Select multiple records using the checkboxes to perform bulk deletion and management tasks.

3

Dynamic Records

Quickly jump to client details or edit records directly from the table using the action menus.

4

Real-time Search

Instantly find any client by name, ID, or DIN using the global search bar updated in real-time.

PRO TIP

Use the "Specific Period" filter to generate custom reports for any date range required by your firm.

Got it, thanks!
